2018 TRANSPORTED CHILLED SEMEN REQUEST FORM

INFORMATION FOR MARE OWNERS

Tamworth Equine Veterinary Centre provide a chilled semen collection and dispatch service for stallions either resident for the season or for walk-in stallions. Routine collections are made Monday – Friday mornings, however we endeavor to meet all requests made outside these times. Tamworth Equine Veterinary Centre does not accept any responsibility for failure of shipments to meet delivery deadlines and thereby compromise insemination schedules. It should be noted that weekend and public holiday consignments are particularly difficult to secure with regional freight companies and any such shipments are taken on risk by the mare owner.

Semen requests must be made **via email by 5.30pm EST** the day before collection. If you are uncertain as to the final order, please place a tentative order which can be confirmed the next day by 8.30am EST. Please use the attached form for placing your order.

2018 Semen Collection, processing and packaging fee \$250 (Inc GST)

PLUS

Freight charges as follows:

Toll Priority – Overnight	\$110
Qantas Freight Express – Airport to airport	\$125
Qantas freight Priority – Airport to airport – Guaranteed next flight	\$250

A second dose of semen may be sent at freight only costs if required for the same cycle if semen is mislaid or misdirected in transit or if the mare fails to ovulate and oestrus is prolonged. The standard collection and freight charges apply if the mare fails to conceive and subsequent collections are ordered for successive cycles.

If semen is urgent or non-routine freight is required, then additional freight charges may be incurred.

All costs for the collection and dispatch of semen are the responsibility of the mare owner unless otherwise stated by the stallion owner. No semen will be dispatched until payment has been received by Tamworth Equine Veterinary Centre.

Please note that authorization for shipment will be sought from the stallion owner prior to semen being dispatched. Make sure you have made the appropriate bookings and payments with the stallion owner prior to a semen request being lodged.

A reference sample of each collection is retained by TEVC for quality control purposes and a semen report is supplied with each shipment. If you or your veterinarian have any concerns regarding the quality of the semen or condition in which it arrived, then please contact the practice as soon as possible.

Semen transport and shipper boxes must be returned to TEVC in a timely manner. Australia post is a suitable method of return.
